4. Basic Schema	3
4.1. Generic Structure	3
4.2. Identifiers	5
4.2.1. Mapping for Identifiers	5
4.2.2. Identifiers for QWI	6
4.2.3. Identifiers for J2J	7
4.2.4. Identifiers for J2JOD	8
4.2.5. Identifiers for PSEO	9
4.3. Indicators	10
4.3.1. National QWI and State-Level QWI	10
4.3.2. National QWI and State-Level QWI Rates	15
4.3.3. Job-to-Job Flow Counts (J2J)	18
4.3.4. Job-to-Job Flow Rates (J2JR)	23
4.3.5. Job-to-Job Flow Origin-Destination (J2JOD)	26
4.3.6. Post-Secondary Employment Outcomes Earnings (PSEOE)	28
4.3.7. Post-Secondary Employment Outcomes Flows (PSEOF)	29
4.4. Variability Measures	30
4.4.1. Generic Structure	30
4.4.2. National QWI and State-Level QWI	32
4.4.3. National QWI and State-Level QWI Rates	33
4.4.4. Job-to-Job Flow Counts (J2J)	34
4.4.5. Job-to-Job Flow Rates (J2JR)	38
4.4.6. Job-to-Job Flow Origin-Destination (J2JOD)	40
5. Categorical Variables	42
5.1. Agegrp	42
5.2. Education	42
5.3. Ethnicity	42
5.4. Firmage	43
5.5. Firmsize	43
5.6. Ownercode	43
5.7. Periodicity	44

5.8. Quarter	44
5.9. Race	44
5.10. Seasonadj	45
5.11. Sex	45
5.12. Industry	46
5.12.1. Industry levels	46
5.12.2. Industry	46
5.13. Educational Institution	47
5.13.1. Institution Levels	47
5.13.2. Institution	47
5.14. Degree Level	48
5.15. Classification of Instruction Programs (CIP)	48
5.15.1. CIP Levels	48
5.15.2. CIP Codes	48
5.16. Grad Cohort	49
5.17. Grad Cohort Years	50
5.18. Geography	50
5.18.1. Geographic Levels	50
5.18.2. National and State-Level Values	50
5.18.3. State Postal Codes	51
5.18.4. Detailed State and Substate Level Values	53
5.19. Aggregation Level	56
5.19.1. J2J	56
5.19.2. PSEO	57
5.19.2.1. Restricted 4-Digit CIP Tabulations in Earnings Data (PSEOE)	58
5.19.3. QWI	59
6. Status Flags	60
6.1. Standard Status Flags	60
6.2. IPEDS Count Status Flag	60
7. Metadata	62
7.1. Version Metadata for QWI, J2J, and PSEO Files (version.txt)	62
7.2. Additional Metadata for J2JOD Files (avail.csv)	63
7.3. Metadata on Indicator Availability	64
7.4. Additional Metadata for PSEO Files	65
7.4.1. PSEO Data Partners and Coverage (pseo_[ST]_partners.txt)	65
7.4.2. Institutions Available Within PSEO (pseo_[ST]_institutions.csv)	65

# 1. Purpose

The public-use data from the Longitudinal Employer-Household Dynamics Program, including the Quarterly Workforce Indicators (QWI) and Job-to-Job Flows (J2J), are available for download with the following data schema. These data are available through the LEHD website's Data page at <https://lehd.ces.census.gov/data/> and through the LED Extraction Tool at <https://ledextract.ces.census.gov/>.

This document describes the data schema for LEHD files. LEHD-provided SHP files are separately described in [lehd\\_shapefiles.pdf](#). For each variable, a set of allowable values is defined. Definitions are provided as CSV files, with header variable definitions. Changes are listed in [lehd\\_changelog.pdf](#).

## 2. File naming

The naming conventions of the data files is documented in [lehd\\_csv\\_naming.pdf](#).

## 3. Extends

This version reimplements some features from V4.0. Many files compliant with LEHD or QWI Schema v4.0 will also be compliant with this schema, but compatibility is not guaranteed.

## 4. Basic Schema

Each data file is structured as a CSV file. The first columns contain [\[identifiers\]](#), subsequent columns contain [\[indicators\]](#), followed by [status flags](#). In some cases, visually formatted Excel (XLSX) files are also available, containing the same information together with header lines on each sheet.

### 4.1. Generic Structure

Column name
[ Identifier1 ]
[ Identifier2 ]
[ Identifier3 ]
[ ... ]
[ Indicator 1 ]
[ Indicator 2 ]
[ Indicator 3 ]
[ ... ]
[ Status Flag 1 ]
[ Status Flag 2 ]

<b>Column name</b>
[ Status Flag 3 ]
[ ... ]

Note: A full list of indicators for each type of file are shown below in the [Indicators](#) section. While all indicators are included in the CSV files, only the requested indicators will be included in data outputs from the LED Extraction Tool.

## 4.2. Identifiers

Records, unless otherwise noted, are parts of time-series data. Unique record identifiers are noted below, by file type. Identifiers without the year and quarter component can be considered a series identifier.

### 4.2.1. Mapping for Identifiers

( [lehd\\_mapping\\_identifiers.csv](#) )

Each of the released files has a set of variables uniquely identifying records ('Identifiers'). The table below relates the set of identifier specifications to the released files. The actual CSV files containing the identifiers for each set are listed after this table. Each identifier can take on a specified list of values, documented in the section on [Categorical Variables](#).

<b>identifiers</b>	<b>QWI</b>	<b>NQW I</b>	<b>J2J</b>	<b>J2JR</b>	<b>J2JOD</b>	<b>PSEO E</b>	<b>PSEO F</b>	<b>LODE S</b>
lehd_identifiers_qwi	1	1						
lehd_identifiers_j2j			1	1				
lehd_identifiers_j2jod					1			
lehd_identifiers_pseo						1	1	

## 4.2.2. Identifiers for QWI

( [lehd\\_identifiers\\_qwi.csv](#) )

<b>Variable</b>	<b>Type</b>	<b>label</b>
periodicity	Char(1)	Periodicity of report
seasonadj	Char(1)	Seasonal Adjustment Indicator
geo_level	Char(1)	Group: Geographic level of aggregation
geography	Char(8)	Group: Geography code
ind_level	Char(1)	Group: Industry level of aggregation
industry	Char(5)	Group: Industry code
ownercode	Char(3)	Group: Ownership group code
sex	Char(1)	Group: Gender code
agegrp	Char(3)	Group: Age group code (WIA)
race	Char(2)	Group: race
ethnicity	Char(2)	Group: ethnicity
education	Char(2)	Group: education
firmage	Char(1)	Group: Firm Age group
firmsize	Char(1)	Group: Firm Size group
year	Num	Time: Year
quarter	Num	Time: Quarter

### 4.2.3. Identifiers for J2J

( [lehd\\_identifiers\\_j2j.csv](#) )

<b>Variable</b>	<b>Type</b>	<b>label</b>
periodicity	Char(1)	Periodicity of report
seasonadj	Char(1)	Seasonal Adjustment Indicator
geo_level	Char(1)	Group: Geographic level of aggregation
geography	Char(8)	Group: Geography code
ind_level	Char(1)	Group: Industry level of aggregation
industry	Char(5)	Group: Industry code
ownercode	Char(3)	Group: Ownership group code
sex	Char(1)	Group: Gender code
agegrp	Char(3)	Group: Age group code (WIA)
race	Char(2)	Group: race
ethnicity	Char(2)	Group: ethnicity
education	Char(2)	Group: education
firmage	Char(1)	Group: Firm Age group
firmsize	Char(1)	Group: Firm Size group
year	Num	Time: Year
quarter	Num	Time: Quarter
agg_level	Num	Aggregation Level Indicator

## 4.2.4. Identifiers for J2JOD

( [lehd\\_identifiers\\_j2jod.csv](#) )

Variable	Type	label
periodicity	Char(1)	Periodicity of report
seasonadj	Char(1)	Seasonal Adjustment Indicator
geo_level	Char(1)	Group: Geographic level of aggregation of destination job
geography	Char(8)	Group: Geography code of destination job
ind_level	Char(1)	Group: Industry level of aggregation of destination job
industry	Char(5)	Group: Industry code of destination job
ownercode	Char(3)	Group: Ownership group code of destination job
sex	Char(1)	Group: Gender code
agegrp	Char(3)	Group: Age group code (WIA)
race	Char(2)	Group: race
ethnicity	Char(2)	Group: ethnicity
education	Char(2)	Group: education
firmage	Char(1)	Group: Firm Age group
firmsize	Char(1)	Group: Firm Size group
year	Num	Time: Year
quarter	Num	Time: Quarter
agg_level	Num	Aggregation Level Indicator
geo_level_orig	Char(1)	Group: Geographic level of aggregation of origin job
geography_orig	Char(8)	Group: Geography code of origin job
ind_level_orig	Char(1)	Group: Industry level of aggregation of origin job
industry_orig	Char(5)	Group: Industry code of origin job
ownercode_orig	Char(3)	Group: Ownership group code of origin job
firmage_orig	Char(1)	Group: Firm Age group of origin job
firmsize_orig	Char(1)	Group: Firm Size group of origin job

## 4.2.5. Identifiers for PSEO

( [lehd\\_identifiers\\_pseo.csv](#) )

<b>Variable</b>	<b>Type</b>	<b>label</b>
agg_level_pseo	Numeric	Aggregation level
inst_level	Char(1)	Tabulation level of the institution
institution	Char(8)	Place of the institution
degree_level	Char(2)	Degree level code
cip_level	Char(1)	Degree field level of aggregation
cipcode	Char(7)	Degree field
grad_cohort	Char(4)	First year of graduation cohort (YYYY) - All Cohorts 0000
grad_cohort_years	Numeric	Number of years in graduation cohort
geo_level	Char(1)	Group: Geographic level of employment
geography	Char(8)	Group: Geography code of employment
ind_level	Char(1)	Group: Industry level of employment
industry	Char(5)	Group: Industry code of employment

## 4.3. Indicators

The following tables and associated mapping files list the indicators available on each file. The descriptor files themselves are structured as follows:

- The "Indicator Variable" is the short name of the variable on the CSV files, suitable for machine processing in a wide variety of statistical applications.
- When given, the "Alternate name" may appear in related documentation and articles.
- The "Status Flag" is used to indicate publication or data quality status (see [Status Flags](#)).
- The "Indicator Name" is a non-abbreviated version of the "Indicator Variable".
- The "Description" provides more verbose description of the variable.
- "Units" identify the type of variable according to a very simplified taxonomy (not formalized yet): counts, rates, monetary amounts.
- "Concept" classifies the variables into higher-level concepts. The taxonomy for these concepts has not been finalized yet, see [label\\_concept\\_draft.csv](#) for a draft version.
- The "Base" indicates the denominator used to compute the statistic, and may be '1'.

### 4.3.1. National QWI and State-Level QWI

( [variables\\_qwi.csv](#) )

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
Emp	B	sEmp	Beginning-of-Quarter Employment	Estimate of the total number of jobs on the first day of the reference quarter	Count	Employment	1
EmpEnd	E	sEmpEnd	End-of-Quarter Employment	Estimate of the number of jobs on the last day of the quarter	Count	Employment	1
EmpS	F	sEmpS	Full-Quarter Employment (Stable)	Estimate of stable jobs - the number of jobs that are held on both the first and last day of the quarter with the same employer	Count	Employment	1

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
EmpTotal	M	sEmpTotal	Employment - Reference Quarter	Estimated count of people employed in a firm at any time during the quarter	Count	Employment	1
EmpSpv	Fpv	sEmpSpv	Full-Quarter Employment in the Previous Quarter	Estimate of stable jobs in the quarter before the reference quarter	Count	Employment	1
HirA	A	sHirA	Hires (All Accessions)	Estimated number of workers who started a new job in the specified quarter	Count	Hire	1
HirN	H	sHirN	New Hires	Estimated number of workers who started a new job excluding recall hires	Count	Hire	1
HirR	R	sHirR	Recall Hires	Estimated number of workers who returned to the same employer where they had worked within the previous year	Count	Hire	1
Sep	S	sSep	Separations (All)	Estimated number of workers whose job with a given employer ended in the specified quarter	Count	Separation	1
HirAEnd	CA	sHirAEnd	End-of-Quarter Hires	Estimated number of workers who started a new job in the specified quarter, which continued into next quarter	Count	Hire	1

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
SepBeg	CS	sSepBeg	Beginning-of-Quarter Separations	Estimated number of workers whose job in the previous quarter continued and ended in the given quarter	Count	Separation	1
HirAEndRepl	EI	sHirAEndRepl	Replacement Hires	Hires into continuous quarter employment in excess of job creation	Count	Hire	1
HirAEndR	CAR	sHirAEndR	End-of-Quarter Hiring Rate	Hires as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
SepBegR	CSR	sSepBegR	Beginning-of-Quarter Separation Rate	Separations as a percent of average employment	Rate	Separation	$(\text{Emp} + \text{EmpEnd})/2$
HirAEndReplR	EIR	sHirAEndReplR	Replacement Hiring Rate	Replacement hires as a percent of the average of beginning- and end-of-quarter employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
HirAS	FA	sHirAS	Hires (All Hires into Full-Quarter Employment)	Estimated number of workers that started a job that lasted at least one full quarter with a given employer	Count	Hire	1
HirNS	FH	sHirNS	New Hires (New Hires into Full-Quarter Employment)	Estimated number of workers who started a job that they had not held within the past year and the job turned into a job that lasted at least a full quarter with a given employer	Count	Hire	1

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
SepS	FS	sSepS	Separations (Flows out of Full-Quarter Employment)	Estimated number of workers who had a job for at least a full quarter and then the job ended	Count	Separation	1
SepSnx	FSnx	sSepSnx	Separations in the Next Quarter (Flows out of Full-Quarter Employment)	Estimated number of workers in the next quarter who had a job for at least a full quarter and then the job ended	Count	Separation	1
TurnOvrS	FT	sTurnOvrS	Turnover (Stable)	The rate at which stable jobs begin and end	Rate	Turnover	2*EmpS
FrmJbGn	JC	sFrmJbGn	Firm Job Gains (Job Creation)	Estimated number of jobs gained at firms throughout the quarter	Count	Job Flows	1
FrmJbLs	JD	sFrmJbLs	Firm Job Loss (Job Destruction)	Estimated number of jobs lost at firms throughout the quarter	Count	Job Flows	1
FrmJbC	JF	sFrmJbC	Firm Job Change (Net Change)	Difference between firm job gain and firm job loss	Count	Job Flows	1
FrmJbGnS	FJC	sFrmJbGnS	Firm Job Gains (Stable)	Estimated number of full-quarter jobs gained at firms	Count	Job Flows	1
FrmJbLsS	FJD	sFrmJbLsS	Firm Job Loss (Stable)	Estimated number of full-quarter jobs lost at firms	Count	Job Flows	1
FrmJbCS	FJF	sFrmJbCS	Firm Job Change (Stable; Net Change)	Net growth in jobs that last a full quarter	Count	Job Flows	1
EarnS	ZW3	sEarnS	Average Monthly Earnings (Full-Quarter Employment)	Average monthly earnings of employees with stable jobs	Dollars	Earnings	EmpS

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
EarnBeg	ZW2B	sEarnBeg	Average Monthly Earnings (Beginning-of-Quarter Employment)	Average monthly earnings of employees who worked on the first day of the reference quarter	Dollars	Earnings	Emp
EarnHirAS	ZWFA	sEarnHirAS	Average Monthly Earnings (All Hires into Full-Quarter Employment)	Average monthly earnings for workers who started a job that turned into a job lasting a full quarter	Dollars	Earnings	HirAS
EarnHirNS	ZWFH	sEarnHirNS	Average Monthly Earnings (New Hires into Full-Quarter Employment)	Average monthly earnings of newly stable employees	Dollars	Earnings	HirNS
EarnSepS	ZWFS	sEarnSepS	Average Monthly Earnings (Flows out of Full-Quarter Employment)	Average monthly earnings of separations from full-quarter status at an establishment	Dollars	Earnings	SepSnx
Payroll	W1	sPayroll	Total Quarterly Payroll	Total quarterly payroll for all jobs	Dollars	Earnings	1

### 4.3.2. National QWI and State-Level QWI Rates

Rates are computed from published data, and are provided as a convenience.

( [variables\\_qwir.csv](#) )

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
HirAR	AR	sHirAR	Hiring Rate (All Accessions)	All accessions as a percent of average employment	Rate	Hire	$(Emp + EmpEnd)/2$
HirNR	HR	sHirNR	New Hiring Rate	New hires as a percent of average employment	Rate	Hire	$(Emp + EmpEnd)/2$
HirRR	RR	sHirRR	Recall Rate	Recall hires as a percent of average employment	Rate	Hire	$(Emp + EmpEnd)/2$
SepR	SR	sSepR	Separation Rate (All Separations)	All separations as a percent of average employment	Rate	Separation	$(Emp + EmpEnd)/2$
HirAEndR	CAR	sHirAEndR	End-of-Quarter Hiring Rate	Hires as a percent of average employment	Rate	Hire	$(Emp + EmpEnd)/2$
SepBeginR	CSR	sSepBeginR	Beginning-of-Quarter Separation Rate	Separations as a percent of average employment	Rate	Separation	$(Emp + EmpEnd)/2$
HirAEndReplR	EIR	sHirAEndReplR	Replacement Hiring Rate	Replacement hires as a percent of average employment	Rate	Hire	$(Emp + EmpEnd)/2$
HirASR	FAR	sHirASR	Hiring Rate (Flows into Full-Quarter Employment)	Flows into stable employment as a percent of average stable employment	Rate	Hire	$(EmpSpv + EmpS)/2$
HirNSR	FHR	sHirNSR	New Hiring Rate (New Hires to Full-Quarter Status)	New hires into stable employment as a percent of average stable employment	Rate	Hire	$(EmpSpv + EmpS)/2$

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
SepSR	FSR	sSepSR	Separation Rate (Flows out of Full-Quarter Employment)	Flows out of stable employment as a percent of average stable employment	Rate	Separation	$(EmpS_{pv} + EmpS)/2$
SepSnxR	FSnxR	sSepSnxR	Separation Rate in the Next Quarter (Flow out of Full-Quarter Employment)	Flow rate out of stable employment in the next quarter	Rate	Separation	$(EmpS_{pv} + EmpS)/2$
TurnOverSR	FTR	sTurnOverSR	Turnover Rate (Stable)	The rate at which stable jobs begin and end	Rate	Turnover	$2 * EmpS$
FrmJobGnR	JCR	sFrmJobGnR	Firm Job Gain Rate (Job Creation Rate)	Estimated number of jobs gained at firms throughout the quarter as a percent of average employment	Rate	Job Flows	$(Emp + EmpEnd)/2$
FrmJobLossSR	JDR	sFrmJobLossR	Firm Job Loss Rate (Job Destruction Rate)	Estimated number of jobs lost at firms throughout the quarter as a percent of average employment	Rate	Job Flows	$(Emp + EmpEnd)/2$
FrmJobChangeR	JFR	sFrmJobChangeR	Firm Job Change Rate (Net Change Rate)	Difference between firm job gain and firm job loss as a percent of average employment	Rate	Job Flows	$(Emp + EmpEnd)/2$
FrmJobGnSR	FJCR	sFrmJobGnSR	Firm Job Gain Rate (Stable)	Estimated number of full-quarter jobs gained at firms as a percent of average stable employment	Rate	Job Flows	$(EmpS_{pv} + EmpS)/2$
FrmJobLossSR	FJDR	sFrmJobLossSR	Firm Job Loss Rate (Stable)	Estimated number of full-quarter jobs lost at firms as a percent of average stable employment	Rate	Job Flows	$(EmpS_{pv} + EmpS)/2$

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
FrmJbCSR	FJFR	sFrmJbCSR	Firm Job Change Rate (Stable; Net Change Rate)	Net growth in jobs that last a full quarter as a percent of average stable employment	Rate	Job Flows	$(EmpS_{pv} + EmpS) / 2$

### 4.3.3. Job-to-Job Flow Counts (J2J)

( [variables\\_j2j.csv](#) )

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
MHire	all_dom a2	sMHire	Hires	Hires into a worker's main job	Count	Hire	1
MSep	all_dom s2	sMSep	Separations	Separations from a worker's main job	Count	Separation	1
MJobStart	first_dom me	sMJobStart	Main Job Starts	New main jobs due to hires and instances when a previously existing secondary job becomes the main source of earnings	Count	Hire	1
MJobEnd	last_dom mb	sMJobEnd	Main Job Ends	End of main jobs due to separations and instances when another job becomes the main source of earnings	Count	Separation	1
EEHire	ee_dom a2	sEEHire	Job-to-Job Hires (Continuous Employment)	Hires following a separation with no observed nonemployment spell	Count	Hire	1
EESep	ee_dom s2	sEESep	Job-to-Job Separations (Continuous Employment)	Separations followed by a hire with no observed nonemployment spell	Count	Separation	1
AQHire	aq_dom a2	sAQHire	Job-to-Job Hires (Brief Nonemployment)	Hires following a separation with a short nonemployment spell	Count	Hire	1
AQSep	aq_dom s2	sAQSep	Job-to-Job Separations (Brief Nonemployment)	Separations followed by a hire with a short nonemployment spell	Count	Separation	1

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
J2JHire	j2j_dom a2	sJ2JHire	Job-to-Job Hires	Hires following a separation (short or no observed nonemployment spell)	Count	Hire	1
J2JSep	j2j_dom s2	sJ2JSep	Job-to-Job Separations	Separations followed by a hire (short or no observed nonemployment spell)	Count	Separation	1
NEHire	ne_dom a2	sNEHire	Hires from Nonemployment	Hires following any spell of nonemployment	Count	Hire	1
ENSep	en_dom s2	sENSep	Separations to Nonemployment	Separations into any spell of nonemployment	Count	Separation	1
NEPersist	ne2_dom a2	sNEPersist	Hires from Persistent Nonemployment	Hires following a spell of persistent nonemployment	Count	Hire	1
ENPersist	en2_dom ms2	sENPersist	Separations to Persistent Nonemployment	Separations into a spell of persistent nonemployment	Count	Separation	1
NEFull Q	ne2p_dom a2	sNEFull Q	Hires from Full-Quarter Nonemployment	Hires following a spell of full-quarter nonemployment (does not include intermittently employed)	Count	Hire	1
ENFull Q	en2p_dom ms2	sENFull Q	Separations to Full-Quarter Nonemployment	Separations into a spell of full-quarter nonemployment (does not include intermittently employed)	Count	Separation	1
MainB	domB	sMainB	Employment (Beginning of Quarter)	Main jobs held on the first day of the quarter	Count	Employment	1

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
MainE	domE	sMainE	Employment (End of Quarter)	Main jobs held on the last day of the quarter	Count	Employment	1
EESepS	fee_doms2	sEESepS	Stable Job-to-Job Separations (Continuous Employment)	Separations from stable employment followed by a hire to stable employment with no observed nonemployment spell	Count	Separation	1
EEHireS	fee_doma2	sEEHireS	Stable Job-to-Job Hires (Continuous Employment)	Hires to stable employment following a separation from stable employment with no observed nonemployment spell	Count	Hire	1
AQSepS	faq_doms2	sAQSepS	Stable Job-to-Job Separations (Brief Nonemployment)	Separations from stable employment followed by a hire to stable employment with a short nonemployment spell	Count	Separation	1
AQHireS	faq_doma2	sAQHireS	Stable Job-to-Job Hires (Brief Nonemployment)	Hires to stable employment following a separation from stable employment with a short nonemployment spell	Count	Hire	1
NEPersistS	fne2_doma2	sNEPersistS	Stable Hires from Persistent Nonemployment	Hires to stable employment following a spell of persistent nonemployment	Count	Hire	1

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
ENPersistS	fen2_doms2	sENPersistS	Stable Separations to Persistent Nonemployment	Separations from stable employment into a spell of persistent nonemployment	Count	Separation	1
JobStays	f4domb_e	sJobStays	Stable Job Stayer	Stable main jobs that did not change during the reference quarter	Count	Employment	1
MainBS	fdomb	sMainBS	Stable Employment (Beginning of Quarter)	Stable main jobs held on the first day of the quarter	Count	Employment	1
MainES	fdome	sMainES	Stable Employment (End of Quarter)	Stable main jobs held on the last day of the quarter	Count	Employment	1
NEHireSEarn_Dest	fne2_doma2_kfqearn	sNEHireSEarn_Dest	Average Earnings following Stable Hires from Persistent Nonemployment	Average quarterly earnings following hires to stable employment from a spell of persistent nonemployment	Dollars	Earnings	NEPersistS
ENSEpSEarn_Orig	fen2_doms2_jfqearn	sENSEpSEarn_Orig	Average Earnings prior to Stable Separations to Persistent Nonemployment	Average quarterly earnings prior to separations from stable employment into a spell of persistent nonemployment	Dollars	Earnings	ENPersistS
JobStaysSEarn_Orig	f4domb_e_jfqearn	sJobStaysSEarn_Orig	Average Earnings prior to Stable Job Stayer	Average quarterly earnings in the previous quarter when workers stayed in a stable job	Dollars	Earnings	JobStays
JobStaysSEarn_Dest	f4domb_e_kfqearn	sJobStaysSEarn_Dest	Average Earnings following Stable Job Stayer	Average quarterly earnings in the quarter when workers stayed in a stable job	Dollars	Earnings	JobStays

<b>Indicator Variable</b>	<b>Alternate Name</b>	<b>Status Flag</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>	<b>Base</b>
EESepSEarn_Orig	fee_doms2_jfq_earn	sEESepSEarn_Orig	Average Earnings prior to Stable Job-to-Job Separations (Continuous Employment)	Average quarterly earnings prior to job flows with no observed nonemployment spell	Dollars	Earnings	EE SepS
EEHireSEarn_Dest	fee_doma2_kfq_earn	sEEHireSEarn_Dest	Average Earnings following Stable Job-to-Job Hires (Continuous Employment)	Average quarterly earnings following job flows with no observed nonemployment spell	Dollars	Earnings	EE HireS
AQSepSEarn_Orig	faq_doms2_jfq_earn	sAQSepSEarn_Orig	Average Earnings prior to Stable Job-to-Job Separations (Brief Nonemployment)	Average quarterly earnings prior to job flows with a short nonemployment spell	Dollars	Earnings	AQ SepS
AQHireSEarn_Dest	faq_doma2_kfq_earn	sAQHireSEarn_Dest	Average Earnings following Stable Job-to-Job Hires (Brief Nonemployment)	Average quarterly earnings following job flows with a short nonemployment spell	Dollars	Earnings	AQ HireS

### 4.3.4. Job-to-Job Flow Rates (J2JR)

( [variables\\_j2jr.csv](#) )

Rates are computed from published data, and are provided as a convenience.

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
MHireR	all_dom a2_rate	sMHire R	Hires	Rate of hires into a worker's main job	Rate	Hire	((Main B+ MainE)/2)
MSepR	all_dom s2_rate	sMSepR	Separations	Rate of separations from a worker's main job	Rate	Separation	((Main B+ MainE)/2)
MJobStartR	first_dom me_rate	sMJobS tartR	Main Job Starts	Rate of new main jobs due to hires and instances when a previously existing secondary job becomes the main source of earnings	Rate	Hire	((Main B+ MainE)/2)

y10_p75_earnings	status_y10_earnings	Earnings 75th Percentile in Year 10 (2019 Dollars)	Dollars	Earnings
y10_grads_earn	status_y10_grads_earn	Count of Employed Graduates in Year 10	Count	Employment
y1_ipeds_count	status_y1_ipeds_count	Count of IPEDS Reported Graduates of Programs Included in Year 1 Earnings	Count	Graduates
y5_ipeds_count	status_y5_ipeds_count	Count of IPEDS Reported Graduates of Programs Included in Year 5 Earnings	Count	Graduates
y10_ipeds_count	status_y10_ipeds_count	Count of IPEDS Reported Graduates of Programs Included in Year 10 Earnings	Count	Graduates

### 4.3.7. Post-Secondary Employment Outcomes Flows (PSEOF)

( [variables\\_pseof.csv](#) )

<b>Indicator Variable</b>	<b>Status Flag</b>	<b>Description</b>	<b>Units</b>	<b>Concept</b>
y1_grads_emp	status_y1_grads_emp	Count of Employed Graduates in Year 1	Count	Employment
y1_grads_emp_instate	status_y1_grads_emp_instate	Count of Graduates Employed in Same State as Educational Institution in Year 1	Count	Employment
y5_grads_emp	status_y5_grads_emp	Count of Employed Graduates in Year 5	Count	Employment
y5_grads_emp_instate	status_y5_grads_emp_instate	Count of Graduates Employed in Same State as Educational Institution in Year 5	Count	Employment
y10_grads_emp	status_y10_grads_emp	Count of Employed Graduates in Year 10	Count	Employment
y10_grads_emp_instate	status_y10_grads_emp_instate	Count of Graduates Employed in Same State as Educational Institution in Year 10	Count	Employment
y1_grads_nme	status_y1_grads_nme	Count of Graduates Jobless or Marginally Employed in Year 1	Count	Employment
y5_grads_nme	status_y5_grads_nme	Count of Graduates Jobless or Marginally Employed in Year 5	Count	Employment
y10_grads_nme	status_y10_grads_nme	Count of Graduates Jobless or Marginally Employed in Year 10	Count	Employment

## 4.4. Variability Measures

The following tables and associated mapping files list the variability measures available on each file. The "Variability Measure" is the short name of the variable on the CSV files, suitable for machine processing in a wide variety of statistical applications. When given, the "Alternate Name" may appear in related documentation and articles. The "Variable Name" is a more verbose description of the variability measure.

Six variability measures are published:

- Total variability, prefixed by vt\_
- Standard error, prefixed by st\_, and computed as the square root of Total Variability
- Between-implicate variability, prefixed by vb\_
- Average within-implicate variability, prefixed by vw\_
- Degrees of freedom, prefixed by df\_
- Missingness ratio, prefixed by mr\_

A missing variability measure indicates a structural zero in the corresponding indicator. This is currently not associated with a flag.

### 4.4.1. Generic Structure

Column name
[ Identifier1 ]
[ Identifier2 ]
[ Identifier3 ]
[ ... ]
[ Standard error for Indicator 1 ]
[ Standard error for Indicator 2 ]
[ Standard error for Indicator 3 ]
[ ... ]
[ Total variation for Indicator 1 ]
[ Total variation for Indicator 2 ]
[ Total variation for Indicator 3 ]
[ ... ]
[ Between-implicate variability for Indicator 1 ]
[ Between-implicate variability for Indicator 2 ]
[ Between-implicate variability for Indicator 3 ]
[ ... ]

Column name
[ Average within-implicate variability for Indicator 1 ]
[ Average within-implicate variability for Indicator 2 ]
[ Average within-implicate variability for Indicator 3 ]
[ ... ]
[ Degrees of freedom for Indicator 1 ]
[ Degrees of freedom for Indicator 2 ]
[ Degrees of freedom for Indicator 3 ]
[ ... ]
[ Missingness ratio for Indicator 1 ]
[ Missingness ratio for Indicator 2 ]
[ Missingness ratio for Indicator 3 ]
[ ... ]

Note: A full list of indicators for each type of file are shown in the [Indicators](#) section. In the tables below, only a sample of variability measures are printed, but the complete list is available in the linked CSV schema files.

#### 4.4.2. National QWI and State-Level QWI

( [variables\\_qwiv.csv](#) )

<b>Variability measure</b>	<b>Variable name</b>	<b>Units</b>
st_Emp	Standard error of Beginning-of-Quarter Employment	Count
st_EmpEnd	Standard error of End-of-Quarter Employment	Count
st_EmpS	Standard error of Full-Quarter Employment (Stable)	Count
...		
vt_Emp	Total variation of Beginning-of-Quarter Employment	Count
vt_EmpEnd	Total variation of End-of-Quarter Employment	Count
vt_EmpS	Total variation of Full-Quarter Employment (Stable)	Count
...		
vb_Emp	Between-implicate variability for Beginning-of-Quarter Employment	Count
vb_EmpEnd	Between-implicate variability for End-of-Quarter Employment	Count
vb_EmpS	Between-implicate variability for Full-Quarter Employment (Stable)	Count
...		
vm_Emp	Average within-implicate variability for Beginning-of-Quarter Employment	Count
vm_EmpEnd	Average within-implicate variability for End-of-Quarter Employment	Count
vm_EmpS	Average within-implicate variability for Full-Quarter Employment (Stable)	Count
...		
df_Emp	Degrees of freedom for VT of Beginning-of-Quarter Employment	Count
df_EmpEnd	Degrees of freedom for VT of End-of-Quarter Employment	Count
df_EmpS	Degrees of freedom for VT of Full-Quarter Employment (Stable)	Count
...		
mr_HirA	Missingness ratio for Hires (All Accessions)	Count
mr_HirN	Missingness ratio for New Hires	Count
mr_HirR	Missingness ratio for Recall Hires	Count

### 4.4.3. National QWI and State-Level QWI Rates

( [variables\\_qwirv.csv](#) )

Variability measure	Variable name	Units
st_HirAR	Standard error of Hiring Rate (All Accessions)	Rate
st_HirNR	Standard error of New Hiring Rate	Rate
st_HirRR	Standard error of Recall Rate	Rate
...		
vt_HirAR	Total variation of Hiring Rate (All Accessions)	Rate
vt_HirNR	Total variation of New Hiring Rate	Rate
vt_HirRR	Total variation of Recall Rate	Rate
...		
vb_HirAR	Between-implicate variability for Hiring Rate (All Accessions)	Rate
vb_HirNR	Between-implicate variability for New Hiring Rate	Rate
vb_HirRR	Between-implicate variability for Recall Rate	Rate
...		
vm_HirAR	Average within-implicate variability for Hiring Rate (All Accessions)	Rate
vm_HirNR	Average within-implicate variability for New Hiring Rate	Rate
vm_HirRR	Average within-implicate variability for Recall Rate	Rate
...		
df_HirAR	Degrees of freedom for VT of Hiring Rate (All Accessions)	Rate
df_HirNR	Degrees of freedom for VT of New Hiring Rate	Rate
df_HirRR	Degrees of freedom for VT of Recall Rate	Rate
...		
mr_HirAR	Missingness ratio for Hiring Rate (All Accessions)	Rate
mr_HirNR	Missingness ratio for New Hiring Rate	Rate
mr_HirRR	Missingness ratio for Recall Rate	Rate
...		

#### 4.4.4. Job-to-Job Flow Counts (J2J)

( [variables\\_j2j.csv](#) )

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
MHire	Hires	Hires into a worker's main job	Hire
MSep	Separations	Separations from a worker's main job	Separation
MJobStart	Main Job Starts	New main jobs due to hires and instances when a previously existing secondary job becomes the main source of earnings	Hire
MJobEnd	Main Job Ends	End of main jobs due to separations and instances when another job becomes the main source of earnings	Separation
EEHire	Job-to-Job Hires (Continuous Employment)	Hires following a separation with no observed nonemployment spell	Hire
EESep	Job-to-Job Separations (Continuous Employment)	Separations followed by a hire with no observed nonemployment spell	Separation
AQHire	Job-to-Job Hires (Brief Nonemployment)	Hires following a separation with a short nonemployment spell	Hire
AQSep	Job-to-Job Separations (Brief Nonemployment)	Separations followed by a hire with a short nonemployment spell	Separation
J2JHire	Job-to-Job Hires	Hires following a separation (short or no observed nonemployment spell)	Hire
J2JSep	Job-to-Job Separations	Separations followed by a hire (short or no observed nonemployment spell)	Separation
NEHire	Hires from Nonemployment	Hires following any spell of nonemployment	Hire
ENSep	Separations to Nonemployment	Separations into any spell of nonemployment	Separation

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
NEPersist	Hires from Persistent Nonemployment	Hires following a spell of persistent nonemployment	Hire
ENPersist	Separations to Persistent Nonemployment	Separations into a spell of persistent nonemployment	Separation
NEFullQ	Hires from Full-Quarter Nonemployment	Hires following a spell of full-quarter nonemployment (does not include intermittently employed)	Hire
ENFullQ	Separations to Full-Quarter Nonemployment	Separations into a spell of full-quarter nonemployment (does not include intermittently employed)	Separation
MainB	Employment (Beginning of Quarter)	Main jobs held on the first day of the quarter	Employment
MainE	Employment (End of Quarter)	Main jobs held on the last day of the quarter	Employment
EESepS	Stable Job-to-Job Separations (Continuous Employment)	Separations from stable employment followed by a hire to stable employment with no observed nonemployment spell	Separation
EEHiresS	Stable Job-to-Job Hires (Continuous Employment)	Hires to stable employment following a separation from stable employment with no observed nonemployment spell	Hire
AQSepS	Stable Job-to-Job Separations (Brief Nonemployment)	Separations from stable employment followed by a hire to stable employment with a short nonemployment spell	Separation
AQHiresS	Stable Job-to-Job Hires (Brief Nonemployment)	Hires to stable employment following a separation from stable employment with a short nonemployment spell	Hire

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
NEPersistS	Stable Hires from Persistent Nonemployment	Hires to stable employment following a spell of persistent nonemployment	Hire
ENPersistS	Stable Separations to Persistent Nonemployment	Separations from stable employment into a spell of persistent nonemployment	Separation
JobStayS	Stable Job Stayer	Stable main jobs that did not change during the reference quarter	Employment
MainBS	Stable Employment (Beginning of Quarter)	Stable main jobs held on the first day of the quarter	Employment
MainES	Stable Employment (End of Quarter)	Stable main jobs held on the last day of the quarter	Employment
NEHireSEarn_Dest	Average Earnings following Stable Hires from Persistent Nonemployment	Average quarterly earnings following hires to stable employment from a spell of persistent nonemployment	Earnings
ENSepSEarn_Orig	Average Earnings prior to Stable Separations to Persistent Nonemployment	Average quarterly earnings prior to separations from stable employment into a spell of persistent nonemployment	Earnings
JobStaySEarn_Orig	Average Earnings prior to Stable Job Stayer	Average quarterly earnings in the previous quarter when workers stayed in a stable job	Earnings
JobStaySEarn_Dest	Average Earnings following Stable Job Stayer	Average quarterly earnings in the quarter when workers stayed in a stable job	Earnings

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
EESepSEarn_Orig	Average Earnings prior to Stable Job-to-Job Separations (Continuous Employment)	Average quarterly earnings prior to job flows with no observed nonemployment spell	Earnings
EEHireSEarn_Dest	Average Earnings following Stable Job-to-Job Hires (Continuous Employment)	Average quarterly earnings following job flows with no observed nonemployment spell	Earnings
AQSepSEarn_Orig	Average Earnings prior to Stable Job-to-Job Separations (Brief Nonemployment)	Average quarterly earnings prior to job flows with a short nonemployment spell	Earnings
AQHireSEarn_Dest	Average Earnings following Stable Job-to-Job Hires (Brief Nonemployment)	Average quarterly earnings following job flows with a short nonemployment spell	Earnings

#### 4.4.5. Job-to-Job Flow Rates (J2JR)

( [variables\\_j2j.csv](#) )

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
MHireR	Hires	Rate of hires into a worker's main job	Hire
MSepR	Separations	Rate of separations from a worker's main job	Separation
MJobStartR	Main Job Starts	Rate of new main jobs due to hires and instances when a previously existing secondary job becomes the main source of earnings	Hire
MJobEndR	Main Job Ends	Rate of end of main jobs due to separations and instances when another job becomes the main source of earnings	Separation
EEHireR	Job-to-Job Hires (Continuous Employment)	Rate of hires following a separation with no observed nonemployment spell	Hire
EESepR	Job-to-Job Separations (Continuous Employment)	Rate of separations followed by a hire with no observed nonemployment spell	Separation
AQHireR	Job-to-Job Hires (Brief Nonemployment)	Rate of hires following a separation with a short nonemployment spell	Hire
AQSepR	Job-to-Job Separations (Brief Nonemployment)	Rate of separations followed by a hire with a short nonemployment spell	Separation
J2JHireR	Job-to-Job Hires	Rate of hires following a separation (short or no observed nonemployment spell)	Hire
J2JSepR	Job-to-Job Separations	Rate of separations followed by a hire (short or no observed nonemployment spell)	Separation
NEHireR	Hires from Nonemployment	Rate of hires following any spell of nonemployment	Hire
ENSepR	Separations to Nonemployment	Rate of separations into any spell of nonemployment	Separation

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
NEPersistR	Hires from Persistent Nonemployment	Rate of hires following a spell of persistent nonemployment	Hire
ENPersistR	Separations to Persistent Nonemployment	Rate of separations into a spell of persistent nonemployment	Separation
NEFullQR	Hires from Full-Quarter Nonemployment	Rate of hires following a spell of full-quarter nonemployment (does not include intermittently employed)	Hire
ENFullQR	Separations to Full-Quarter Nonemployment	Rate of separations into a spell of full-quarter nonemployment (does not include intermittently employed)	Separation

#### 4.4.6. Job-to-Job Flow Origin-Destination (J2JOD)

( [variables\\_j2j.csv](#) )

<b>Indicator Variable</b>	<b>Indicator Name</b>	<b>Description</b>	<b>Concept</b>
EE	Job-to-Job Flows (Continuous Employment)	Job flows with no observed nonemployment spell	Hire
AQHire	Job-to-Job Flows (Brief Nonemployment)	Job flows with a short nonemployment spell	Hire
EES	Stable Job-to-Job Flows (Continuous Employment)	Job flows from stable employment into stable employment with no observed nonemployment spell	Hire
AQHireS	Stable Job-to-Job Flows (Brief Nonemployment)	Job flows from stable employment into stable employment with a short nonemployment spell	Hire
EESEarn_Orig	Average Earnings prior to Job-to-Job Flows (Continuous Employment)	Average quarterly earnings prior to job flows with no observed nonemployment spell	Earnings
EESEarn_Dest	Average Earnings following Job-to-Job Flows (Continuous Employment)	Average quarterly earnings following job flows with no observed nonemployment spell	Earnings
AQHireSEarn_Orig	Average Earnings prior to Job-to-Job Flows (Brief Nonemployment)	Average quarterly earnings prior to job flows with a short nonemployment spell	Earnings

Indicator Variable	Indicator Name	Description	Concept
AQHireSEarn_D est	Average Earnings following Job-to-Job Flows (Brief Nonemployment)	Average quarterly earnings following job flows with a short nonemployment spell	Earnings

## 5. Categorical Variables

Categorical variable descriptions are displayed above each table, with the variable name shown in parentheses. Unless otherwise stated, every possible value/label combination for each categorical variable is listed. Please note that not all values will be available in every table.

### 5.1. Agegrp

([label\\_agegrp.csv](#))

agegrp	label
A00	All Ages (14-99)
A01	14-18
A02	19-21
A03	22-24
A04	25-34
A05	35-44
A06	45-54
A07	55-64
A08	65-99

### 5.2. Education

([label\\_education.csv](#))

education	label
E0	All Education Categories
E1	Less than high school
E2	High school or equivalent, no college
E3	Some college or Associate degree
E4	Bachelor's degree or advanced degree
E5	Educational attainment not available (workers aged 24 or younger)

### 5.3. Ethnicity

([label\\_ethnicity.csv](#))

ethnicity	label
A0	All Ethnicities

ethnicity	label
A1	Not Hispanic or Latino
A2	Hispanic or Latino

## 5.4. Firmage

( [label\\_firmage.csv](#) )

firmage	label
0	All Firm Ages
1	0-1 Years
2	2-3 Years
3	4-5 Years
4	6-10 Years
5	11+ Years
N	Firm Age Not Available For Public-Sector Firms

## 5.5. Firmsize

( [label\\_firmsize.csv](#) )

firmsize	label
0	All Firm Sizes
1	0-19 Employees
2	20-49 Employees
3	50-249 Employees
4	250-499 Employees
5	500+ Employees
N	Firm Size Not Available For Public-Sector Firms

## 5.6. Ownercode

( [label\\_ownercode.csv](#) )

<b>ownercode</b>	<b>label</b>
A00	State and local government plus private ownership
A01	Federal government
A05	All Private

## 5.7. Periodicity

( [label\\_periodicity.csv](#) )

<b>periodicity</b>	<b>label</b>
A	Annual data
Q	Quarterly data

## 5.8. Quarter

( [label\\_quarter.csv](#) )

<b>quarter</b>	<b>label</b>
1	1st Quarter of the Year (January-March)
2	2nd Quarter of the Year (April-June)
3	3rd Quarter of the Year (July-September)
4	4th Quarter of the Year (October-December)

## 5.9. Race

( [label\\_race.csv](#) )

<b>race</b>	<b>label</b>
A0	All Races
A1	White Alone
A2	Black or African American Alone
A3	American Indian or Alaska Native Alone
A4	Asian Alone
A5	Native Hawaiian or Other Pacific Islander Alone
A6	Some Other Race Alone (Not Used)

<b>race</b>	<b>label</b>
A7	Two or More Race Groups

## 5.10. Seasonadj

([label\\_seasonadj.csv](#))

<b>seasonadj</b>	<b>label</b>
S	Seasonally adjusted
U	Not seasonally adjusted

## 5.11. Sex

([label\\_sex.csv](#))

<b>sex</b>	<b>label</b>
0	All Sexes
1	Male
2	Female

## 5.12. Industry

### 5.12.1. Industry levels

( [label\\_ind\\_level.csv](#) )

ind_level	label
A	All Industries
S	NAICS Sectors
3	NAICS Subsectors
4	NAICS Industry Groups

### 5.12.2. Industry

( [label\\_industry.csv](#) )

Only a small subset of available values shown. The 2017 NAICS (North American Industry Classification System) is used for all years. QWI releases prior to R2018Q1 used the 2012 NAICS classification (see [Schema v4.1.3](#)). For a full listing of all valid 2017 NAICS codes, see <https://www.census.gov/naics/>.

industry	label	ind_level
00	All NAICS Sectors	A
000	All NAICS Subsectors	A
0000	All NAICS Industry Groups	A
11	Agriculture, Forestry, Fishing and Hunting	2
111	Crop Production	3
1111	Oilseed and Grain Farming	4
1112	Vegetable and Melon Farming	4
...		
2383	Building Finishing Contractors	4
2389	Other Specialty Trade Contractors	4
31-33	Manufacturing	2
311	Food Manufacturing	3
3111	Animal Food Manufacturing	4
3112	Grain and Oilseed Milling	4
3113	Sugar and Confectionery Product Manufacturing	4
...		

## 5.13. Educational Institution

### 5.13.1. Institution Levels

( [label\\_inst\\_level.csv](#) )

Educational institutions are tabulated individually in the current data release. Future releases may aggregate to institutions to higher levels, such as state or Census Division.

inst_level	label
I	Institution
S	State of institution
D	Census division of institution
N	All institutions

### 5.13.2. Institution

( [label\\_institution.csv](#) )

Institution identifiers are sourced from the [U.S. Department of Education, Federal Student Aid office](#). This list has been supplemented with records for regional groupings of institutions (may be used in future PSEO tabulations).

institution	label	city	institution_state	inst_level	statefigs
1	Institutions in New England Division			D	
2	Institutions in Middle Atlantic Division			D	
3	Institutions in East North Central Division			D	
...					
00137000	University of Colorado Boulder	Boulder	CO	I	08
00309000	Ohio State University	Columbus	OH	I	39
00332900	Pennsylvania State University (The)	University Park	PA	I	42
00389500	University of Wisconsin - Madison	Madison	WI	I	55
00955800	University of Texas	Austin	TX	I	48
02458500	University of Michigan	Ann Arbor	MI	I	26
...					

## 5.14. Degree Level

([label\\_degree\\_level.csv](#))

The degree levels are sourced from the [National Center for Education Statistics \(NCES\), Integrated Postsecondary Education Data System \(IPEDS\)](#).

degree_level	label
00	All Degree Levels
01	Certificate < 1 year
02	Certificate 1-2 years
03	Associates
04	Certificate 2-4 years
05	Baccalaureate
06	Post-Bacc Certificate
07	Masters
08	Post-Masters Certificate
17	Doctoral - Research/Scholarship
18	Doctoral - Professional Practice

## 5.15. Classification of Instruction Programs (CIP)

### 5.15.1. CIP Levels

([label\\_cip\\_level.csv](#))

cip_level	label
A	All Degree Fields
2	2-Digit CIP Family
4	4-Digit CIP Codes
6	6-Digit CIP Codes

### 5.15.2. CIP Codes

([label\\_cipcode.csv](#))

CIP codes are sourced from the [National Center for Education Statistics \(NCES\), Integrated Postsecondary Education Data System \(IPEDS\)](#). Data are reported using 2020 CIP codes, for all years.

<b>cipcode</b>	<b>label</b>	<b>cip_level</b>	<b>CIPFamily</b>	<b>CIPDefinition</b>
00	All Instructional Programs	A	00	All CIP Codes
01	Agricultural/Animal/Plant/Veterinary Science and Related Fields	2	01	Instructional programs that focus on agriculture, animal, plant, veterinary, and related sciences and that prepares individuals to apply specific knowledge, methods, and techniques to the management and performance of agricultural and veterinary operations.
01.00	Agriculture, General	4	01	Instructional content is defined in code 01.0000.
01.0000	Agriculture, General	6	01	A program that focuses on the general principles and practice of agricultural research and production and that may prepare individuals to apply this knowledge to the solution of practical agricultural problems. Includes instruction in basic animal, plant, and soil science; animal husbandry and plant cultivation; soil conservation; and agricultural operations such as farming, ranching, and agricultural business.
01.XX	Agricultural/Animal/Plant/Veterinary Science and Related Fields (Consolidated 0100-0199)	4	01	Instructional programs that focus on agriculture, animal, plant, veterinary, and related sciences and that prepares individuals to apply specific knowledge, methods, and techniques to the management and performance of agricultural and veterinary operations.
03	Natural Resources and Conservation	2	03	Instructional programs that focus on the various natural resources and conservation fields and prepare individuals for related occupations.

## 5.16. Grad Cohort

**grad\_cohort** is a 4-digit number representing the first year of the graduation cohort. The number of years in the cohort is reported in the separate **Grad Cohort Years** variable.

If **grad\_cohort**=2010 and **grad\_cohort\_years**=3, then the cell includes graduates from 2010, 2011, and 2012.

When tabulating across all cohorts, the value **0000** will be used for `grad_cohort`.

## 5.17. Grad Cohort Years

`grad_cohort_years` is the number of years in the cohort of reference (see [Grad Cohort](#)). It varies by [Degree Level](#). Bachelor's degrees (05) are reported in 3 year cohorts, all other degrees are reported in 5 year cohorts. The `grad_cohort_years` will take a value (3,5). As tabulations are not done across degree types, the appropriate value will be reported in `grad_cohort_years` when `grad_cohort=0000`.

## 5.18. Geography

### 5.18.1. Geographic Levels

([label\\_geo\\_level.csv](#))

Geography labels for data files are provided in separate files, by scope. Each file 'label\_geography\_SCOPE.csv' may contain one or more types of records as flagged by `geo_level`. For convenience, a composite file containing all geocodes is available as [label\\_geography.csv](#). The 2021 vintage of [Census TIGER/Line geography](#) is used for all tabulations as of the R2022Q2 release.

Shapefiles are described in a [separate document](#).

<code>geo_l evel</code>	<code>label</code>	<code>description</code>
N	National (50 States + DC)	Custom code using '00' to denote national scope
D	Divisions	Identifies 1-digit multi-state Census Divisions
S	States	Identifies 2-digit FIPS/ANSI codes
C	Counties	Identifies 5-digit FIPS/ANSI code for counties
M	Metropolitan/Micropolitan (state part)	Identifies 7-digit code constructed from the 2-digit state FIPS code and the 5-digit CBSA code provided by the Census Bureau's Geography Division
B	Metropolitan (complete)	Identifies 5-digit CBSA code for metropolitan areas provided by the Census Bureau's Geography Division. Balance of state including micropolitan areas are identified by custom codes as [ST]999
W	Workforce Investment Areas	2-digit state FIPS code and the 6-digit WIA identifier provided by LED State Partners

### 5.18.2. National and State-Level Values

([label\\_fipsnum.csv](#))

The file [label\\_fipsnum.csv](#) contains values and labels for all entities of `geo_level` 'N' or 'S', and is a summary of separately available files.

<b>geography</b>	<b>label</b>	<b>geo_level</b>
00	National (50 States + DC)	N
01	Alabama	S
02	Alaska	S
04	Arizona	S
05	Arkansas	S
...		

( [label\\_geography\\_division.csv](#) )

The file [label\\_geography\\_division.csv](#) contains values and labels for all entities of `geo_level` 'D'. For more information on which states comprise each division, see the map [here](#).

<b>geography</b>	<b>label</b>	<b>geo_level</b>
1	New England Division	D
2	Middle Atlantic Division	D
3	East North Central Division	D
4	West North Central Division	D
5	South Atlantic Division	D
6	East South Central Division	D
7	West South Central Division	D
8	Mountain Division	D
9	Pacific Division	D
Z	Unclassified	D

### 5.18.3. State Postal Codes

Some parts of the schema use (lower or upper-case) state postal codes.

( [label\\_stusps.csv](#) )

<b>geography</b>	<b>stusps</b>	<b>label</b>
00	US	National (50 States + DC)
01	AL	Alabama
02	AK	Alaska
04	AZ	Arizona
05	AR	Arkansas

<b>geography</b>	<b>states</b>	<b>label</b>
06	CA	California
08	CO	Colorado
09	CT	Connecticut
10	DE	Delaware
11	DC	District of Columbia
12	FL	Florida
13	GA	Georgia
15	HI	Hawaii
16	ID	Idaho
17	IL	Illinois
18	IN	Indiana
19	IA	Iowa
20	KS	Kansas
21	KY	Kentucky
22	LA	Louisiana
23	ME	Maine
24	MD	Maryland
25	MA	Massachusetts
26	MI	Michigan
27	MN	Minnesota
28	MS	Mississippi
29	MO	Missouri
30	MT	Montana
31	NE	Nebraska
32	NV	Nevada
33	NH	New Hampshire
34	NJ	New Jersey
35	NM	New Mexico
36	NY	New York
37	NC	North Carolina
38	ND	North Dakota
39	OH	Ohio
40	OK	Oklahoma

geography	stusps	label
41	OR	Oregon
42	PA	Pennsylvania
44	RI	Rhode Island
45	SC	South Carolina
46	SD	South Dakota
47	TN	Tennessee
48	TX	Texas
49	UT	Utah
50	VT	Vermont
51	VA	Virginia
53	WA	Washington
54	WV	West Virginia
55	WI	Wisconsin
56	WY	Wyoming
72	PR	Puerto Rico
78	VI	United States Virgin Islands

#### 5.18.4. Detailed State and Substate Level Values

Files of type 'label\_geography\_[ST].csv' will contain identifiers and labels for geographic areas entirely comprised within a given state '[ST]'. State-specific parts of cross-state CBSA, in records of type `geo_level = M`, are present on files of type 'label\_geography\_[ST].csv'. The file [label\\_geography\\_metro.csv](#) contains labels for records of type `geo_level = B`, for metropolitan areas only.

Scope	Types	Format file
US	N	<a href="#">label_geography_us.csv</a>
DIVISION	D	<a href="#">label_geography_division.csv</a>
METRO	B	<a href="#">label_geography_metro.csv</a>
AK	S C W M	<a href="#">label_geography_ak.csv</a>

# 5.19. Aggregation Level

## 5.19.1. J2J

( [label\\_agg\\_level.csv](#) )

Measures within the J2J and QWI data products are tabulated on many dimensions, including demographic characteristics, geography, industry, and other firm characteristics. For Origin-Destination (O-D) tables, characteristics of the origin and destination firm can be tabulated separately. Every tabulation level is assigned a unique aggregation index, represented by the `agg_level` variable. This index starts from 1, representing a national level grand total (all industries, workers, etc.), and progresses through different combinations of characteristics. There are gaps in the progression to leave space for aggregation levels that may be included in future data releases.

The following variables are included in the [label\\_agg\\_level.csv](#) file:

Variable	Description
<code>agg_level</code>	index representing level of aggregation reported on a given record
<code>worker_char</code>	demographic (worker) characteristics reported on record
<code>firm_char</code>	firm characteristics reported on record. These will be the characteristics of the destination firm in O-D tabulations
<code>firm_orig_char</code>	characteristics of origin firm reported on record (O-D tabulations only)
<code>j2j</code>	Flag: Aggregation level available on J2J counts tables
<code>j2jr</code>	Flag: Aggregation level available on J2J rates tables
<code>j2jod</code>	Flag: Aggregation level available on J2J O-D tables
<code>qwi</code>	Flag: Aggregation level available on QWI

The characteristics available on an aggregation level are repeated using a series of flags following the standard schema:

- [cip\\_level](#) - degree field reporting level of table
- [inst\\_level](#) - institution reporting level of table
- [geo\\_level](#) - geographic level of table
- [ind\\_level](#) - industry level of table
- `by_` variables - flags indicating other dimensions reported, including ownership, demographics, firm age and size.

A shortened representation of the file is provided below, the complete file is available in the link above.

agg_level	worker_char	firm_char	firm_orig_char	j2j	j2j	j2jo	qwi	geo_level
1					r	d		l
1				1	1	1	0	N
2	Sex			1	1	1	0	N
3	Age			1	1	1	0	N
4	Sex * Age			1	1	1	0	N
5	Race			1	1	1	0	N
9	Ethnicity			1	1	1	0	N
13	Race * Ethnicity			1	1	1	0	N
...								
129		Firm Size		1	1	1	0	N
257		NAICS Sector		1	1	1	0	N
258	Sex	NAICS Sector		1	1	1	0	N
...								
1029	Race	State		1	1	1	0	S
1033	Ethnicity	State		1	1	1	0	S
1037	Race * Ethnicity	State		1	1	1	0	S
...								
49153			Origin [NAICS Sector]	0	0	1	0	N
49154	Sex		Origin [NAICS Sector]	0	0	1	0	N
49155	Age		Origin [NAICS Sector]	0	0	1	0	N
...								

## 5.19.2. PSEO

([label\\_agg\\_level\\_pseo.csv](#))

Measures within the PSEO data product can be tabulated by characteristics of the graduate (e.g., institution attended, instructional program, degree level, etc.) and by characteristics of employment (state, industry). All measures may not be available on all levels of aggregation - for example, earnings variables may not be available when tabulating by place and industry of work, though counts are. Every tabulation level is assigned a unique aggregation index, represented by the `agg_level_pseo` variable. This index starts from 1, representing a national level grand total (all institutions, graduates, industries, etc.), and progresses through different combinations of characteristics. There are gaps in the progression to leave space for aggregation levels that may be included in future data releases. Aggregation levels that are available in the PSEO release will be flagged.

The following variables are included in the [label\\_agg\\_level\\_pseo.csv](#) file:

Variable	Description agg_level_pseo
index representing level of aggregation reported on a given record grad_char	Characteristics of graduate and program firm_char
Characteristics of place of employment pseoe	Flag: aggregation level available on PSEO Earnings pseof

The characteristics available on an aggregation level are repeated using a series of flags following the standard schema:

- [inst\\_levels](#) - institution level of table
- [geo\\_level](#) - geographic level of table
- [ind\\_level](#) - industry level of table
- [by\\_ variables](#) - flags indicating other dimensions reported, including ownership, demographics, firm age and size.

agg_level_pseo	grad_char	firm_char	cip_level	inst_level	geo_level	ind_level	by_grad_cohort	by_degree_level	pseoe	pseof
38	Degree Level * Institution ID		A	I	N	A	0	1	1	1
40	Degree Level * CIP 2-digit * Institution ID		2	I	N	A	0	1	1	1
...										
192	Degree Level * CIP 4-digit * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	4	I	D	S	1	1	0	0

#### 5.19.2.1. Restricted 4-Digit CIP Tabulations in Earnings Data (PSEOE)

Earnings estimates and counts are provided only at the 2-digit CIP level for Masters and Doctor Research programs (degree levels 07 and 17). Records are included for 4-digit programs observed,

but all measures are suppressed.

### **5.19.3. QWI**

Aggregation level to be added to QWI in a future release

# 6. Status Flags

([label\\_flags.csv](#))

Most indicators in the LEHD data products have associated status flags. Each status flag in the tables above contains one of the following valid values. The values and their interpretation are listed in the tables below. Unless otherwise specified in this section, a status flag will take the values described in 7.1 Standard Status Flags.

## 6.1. Standard Status Flags

### *Important*

Note: Currently, the J2J and PSEO tables only contain status flags '-1', '1', '5'. Status flags with values 10 or above only appear in online applications, not in CSV files.

flag	label
-2	no data available in this category for this quarter
-1	data not available to compute this estimate
1	OK
5	Value suppressed because it does not meet US Census Bureau publication standards.
6	Value calculated from other released measures - no significant distortion
7	Value calculated from other released measures - some of which have significantly distorted data
9	Data significantly distorted - fuzzed value released
10	Aggregate of cells - no significant distortion
11	Aggregate of cells not released because component cells do not meet U.S. Census Bureau publication standards
12	Aggregate of cells - some of which have significantly distorted data

## 6.2. IPEDS Count Status Flag

([label\\_flags\\_ipeds\\_count.csv](#))

Graduate counts associated with PSEO earnings tabulations are provided using public use data from the [Integrated Postsecondary Education Data System \(IPEDS\)](#). Counts are linked to graduation cohorts in the PSEO data and included in the PSEOE tables. In a small number of cases, misalignment in programs (CIPCODE) is observed between the IPEDS and PSEO counts. In these cases, the IPEDS counts are adjusted to be consistent with those on PSEO, and the count is flagged accordingly. For higher level aggregations (e.g., all cohorts, all CIPCODE), IPEDS totals may sum over

cohorts or programs for which graduate counts were not available. The counts are released but flagged to indicate missing data. IPEDS counts may be suppressed and flagged as not available in some cases when PSEO earnings data do not meet Census Bureau publication standards.

<b>flag</b>	<b>label</b>
1	IPEDS counts as reported
2	IPEDS counts edited for consistency with PSEO categories
3	IPEDS counts not available
4	IPEDS counts partially missing

# 7. Metadata

( [variables\\_version.csv](#) )

## 7.1. Version Metadata for QWI, J2J, and PSEO Files (version.txt)

Each data release is accompanied by one or more files with metadata on geographic and temporal coverage, in a compact notation. These files follow the following naming convention:

```
version_[type].txt
```

where each component is described in more detail in [lehd\\_csv\\_naming.pdf](#).

The contents contain the following elements:

Component	Source	Description
product	[type]	Type as described in naming convention
fas	[fas]	(optional - concatenated with product) used for QWI to distinguish separate tabulations from the legal [fas] values as described in naming convention
geo	stusps or METRO	Covered geography (uppercase state postal code including entire nation or the word METRO)
geonum	geography	Numeric geography code
start	yyyy:q (QWI, J2J) yyyy (PSEO)	Start year and quarter
end	yyyy:q (QWI, J2J) yyyy (PSEO)	End year and quarter
schema	Vx.y.z	Version of the schema
release	RyyyyQq	Release quarter (identifies when the data was created)
internal	various	Internal identifier used for provenance tracking

For instance, the metadata for the R2021Q2 QWI release of Delaware (example [here](#)) has the following content:

```
QWI_F DE 10 1998:3-2020:3 V4.8.0 R2021Q2 qwipu_de_20210729_1826
QWI_FA DE 10 1998:3-2020:2 V4.8.0 R2021Q2 qwipu_de_20210729_1826
QWI_FS DE 10 1998:3-2020:2 V4.8.0 R2021Q2 qwipu_de_20210729_1826
```

Similarly, the metadata for the R2021Q2 J2J release of Delaware (example [here](#)) has the following content:

```
J2J DE 10 2000:2-2020:2 V4.7.0 R2021Q2 j2jpu_de_20210624_2130
```

Some J2J metadata may contain multiple lines, as necessary.

The PSEO metadata will contain separate lines for the PSEOE and PSEOF tables. The year range for PSEO tables is based on the [Grad Cohort](#), the start year of the graduation cohort. An example for R2019Q1 PSEO release for Colorado institutions (example [here](#)) has the following content:

```
PSEOE CO 08 2001-2015 V4.5.0 2019Q1 pseopu_co_20190617_0839
PSEOF CO 08 2001-2015 V4.5.0 2019Q1 pseopu_co_20190617_0839
```

## 7.2. Additional Metadata for J2JOD Files (avail.csv)

([variables\\_avail.csv](#))

Because the origin-destination (J2JOD) data link two regions, we provide an auxiliary file with the time range that cells containing data for each geographic pairing may appear in a data release.

variable	type	label
geo_level	Char(1)	Geographic level of destination region
geography	Char(8)	Geography code of destination region
geo_level_orig	Char(1)	Geographic level of origin region
geography_orig	Char(8)	Geography code of origin region
start_year	Num	First year regional pair may be observed
start_quarter	Num	First quarter regional pair may be observed
end_year	Num	Last year regional pair may be observed
end_quarter	Num	Last quarter regional pair may be observed

The reference region will always be either the origin or the destination. National tabulations contain records where both origin and destination are [geo\\_level=N](#); state tabulations contain records where [geo\\_level](#) in (N,S); metro tabulations contain records where [geo\\_level](#) in (N,S,B). Data may be suppressed for certain combinations of regions and quarters because the estimates do not meet Census Bureau publication standards.

## 7.3. Metadata on Indicator Availability

([variables\\_lags.csv](#))

Each [Indicator](#) potentially requires leads and/or lags of data to be computed, and thus may not be available for certain time periods. Only two QWI will be available for all quarters of the time span described by start and end in the [version.txt](#) files: EmpTotal and Payroll. The date range for QWI, QWIR, J2J, and J2JR can be found in [version.txt](#); the date range for J2JOD can be found in [avail.csv](#).

For each indicator, the following files contain the quarters of data required to be available relative to the overall date range described in the metadata for the release:

- [lags\\_qwi.csv](#)
- [lags\\_j2j.csv](#)

The files are structured as follows:

<b>variable</b>	<b>type</b>	<b>label</b>
Indicator Variable	Num	Name of the Indicator
Quarters_Required_Prior	Num	Number of quarters of data required to compute indicator relative to start quarter
Quarters_Required_Subsequent	Num	Number of quarters of data required to compute indicator relative to end quarter

## 7.4. Additional Metadata for PSEO Files

Several additional files within each state release are included to provide information on the institutions within the scope of PSEO. The ALL directory consolidates the individual state files.

### 7.4.1. PSEO Data Partners and Coverage (pseo\_[ST]\_partners.txt)

This file contains information on PSEO coverage of graduates, as well as the partner organization(s) providing data. This is presented on several lines of a text file, as follows:

- State numeric FIPS code and state name
- Share of statewide graduates covered by PSEO
- Name(s) of data provider(s) (multiple lines, as required)

The share is derived from [Integrated Postsecondary Education Data System \(IPEDS\)](#) data, using program graduates from 2015 for degree levels within the scope of PSEO. It calculates the number of graduates from institutions that are available to PSEO as a fraction of graduates from all institutions within IPEDS for the reference state.

A sample file follows:

```
08 Colorado
72% of statewide graduates covered (2015 estimate)
Colorado Department of Higher Education
```

### 7.4.2. Institutions Available Within PSEO (pseo\_[ST]\_institutions.csv)

([variables\\_pseo\\_institutions.csv](#))

This file provides the list of institutions that are included in the PSEO release. This file is an extract from [label\\_institution.csv](#).

The files are structured as follows:

variable	type	label
institution	Char(8)	Identifier for Institution (OPEID)
label	Char(70)	Name of Institution
institution_state	Char(2)	Institution State (Postal Code)
statefips	Char(2)	Institution State (Numeric FIPS Code)
