

# OnTheMap for Emergency Management

## Local Employment Dynamics

OnTheMap for Emergency Management is a public data tool that provides an intuitive Web-based interface for viewing the potential effects of disasters on the U.S. workforce and population. Users can easily retrieve reports containing detailed workforce, population, and housing characteristics for hurricanes, floods, wildfires, winter storms, and federal disaster declaration areas.

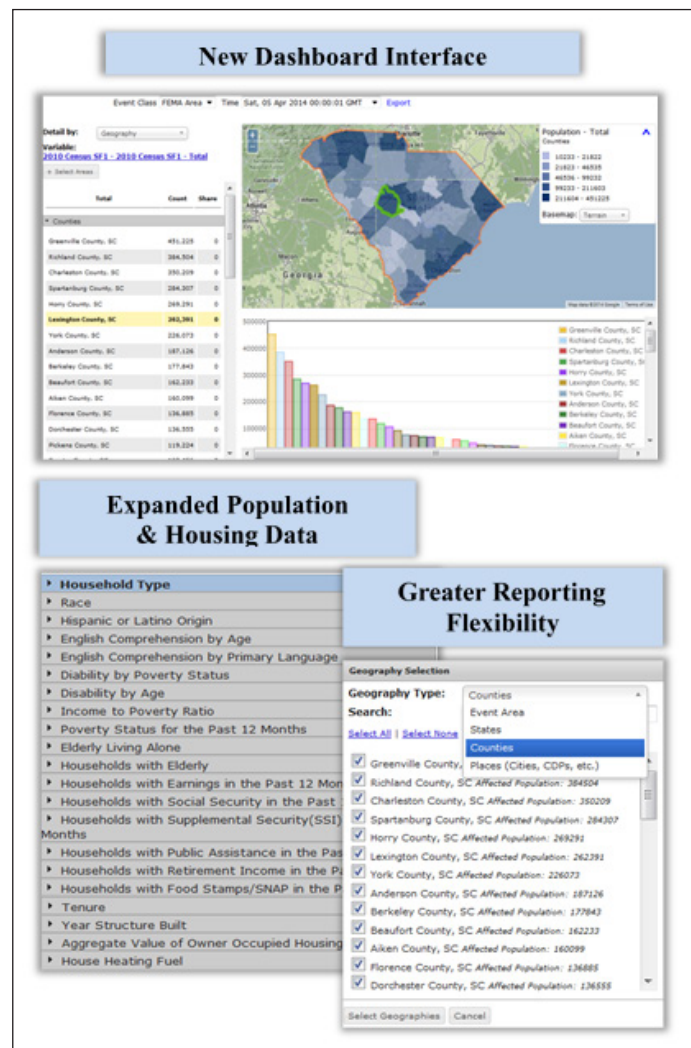

To provide users this information for rapidly changing hazard event areas, OnTheMap for Emergency Management automatically incorporates real time data updates from the National Weather Service's (NWS) National Hurricane Center, Department of Interior (DOI), Department of Agriculture (DOA), and the Federal Emergency Management Agency (FEMA).

Recent improvements have been made that advance the utility of the tool and its data offerings for users including newly added social, economic, and housing data from the American Community Survey (ACS), greater reporting flexibility to better analyze communities affected by disaster events, and a variety of user interface enhancements.

### Version 4 Highlights:

- **Addition of detailed social, economic, and housing data from the American Community Survey (ACS)**
- **Generate reports for specific communities for regional, local, and comparative analyses**
- **New charts and improved dashboard interface**
- **Improved event search tool**
- **New linkable maps and reports for easier sharing**

*OnTheMap for Emergency Management is supported by the state Labor Market Information agencies under the Local Employment Dynamics (LED) partnership with the Census Bureau. Data for MA, PR, and VI are not available at this time.*
