Northwest MO Hotspot – St. Joseph

Discovering Employment Trends with Local Employment Dynamics (LED)

St. Joseph is an economic and employment center for the Northwest region of Missouri. This report details the workers and industries that make this place a hotspot of economic activity.

Northwest Employment Hotspots

St. Joseph, Maryville, Chillicothe, and Kansas City Metro form the largest concentrations of employment in the Northwest Workforce Investment Area.

Workforce Investment Areas are the result of the federal Workforce Investment Act of 1998 (WIA) which funds a number of employment and training programs across the nation.

In 2003, 79% of all workers in the Northwest region were employed in the private sector. This means that 21% were employed in the public sector. Close to 50% of the private sector workers were employed in the cities of St. Joseph (35.1%), Kansas City (7.1%), Maryville (6.4%) and Chillicothe (4.7%). About 43% of the private sector workers were employed in Buchanan and Nodaway Counties.

St. Joseph Census Overview

In 2000, St. Joseph had a population of 73,829 with a median age of 35.7 years old. Most residents were employed in *sales and office occupations* (27.5%) and 80.9% had a high school education or higher.

Where do St. Joseph's Workers Live?

St. Joseph gets most of its workers (53.6%) from within St. Joseph. It is also notable that St. Joseph draws over 5.9% of its workforce from outside of Missouri.

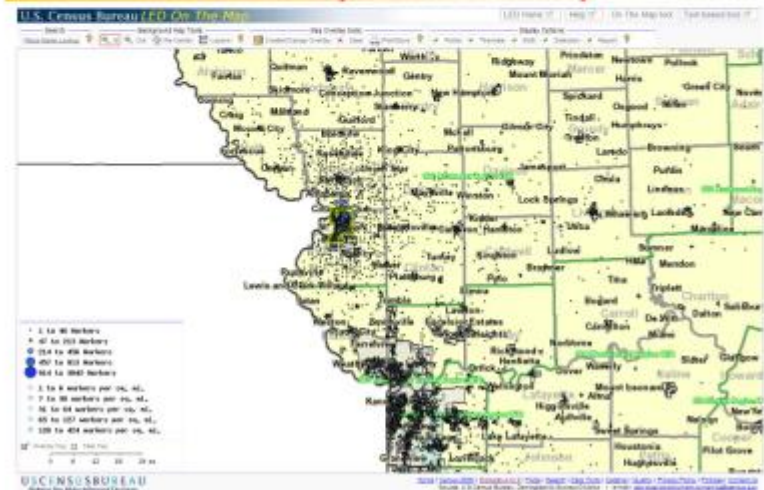

The Local Employment Dynamics (LED) program is a partnership between the U.S. Census Bureau and the agencies in each state that generate and analyze labor market information. The LED On-the-Map tool allows you to designate either an area where workers work and determine where they live, or designate where residents live and determine where those workers commute.

Northeast MO Hotspot - Hannibal

Discovering Employment Trends with Local Employment Dynamics (LED)

Hannibal is an economic and employment center for the Northeast region of Missouri. This report details the workers and industries that make this place a hotspot of economic activity.

Northeast Employment Hotspots

The largest concentrations of employment in the Northeast Workforce Investment Area are found in the cities of Hannibal, Kirksville, Moberly, and Troy. Various localities within St. Charles and St. Louis County are also employment magnets for Northeast region residents.

Workforce Investment Areas are the result of the federal Workforce Investment Act of 1998 (WIA) which funds a number of employment and training programs across the nation.

In 2006, nearly 80% of all workers in the Northeast region were employed in the private sector. Thus a little over 20% were employed in the public sector. 26% of the private sector workers were employed in the cities of Hannibal (9%), Kirksville (7%), Moberly (6%), Macon (2%) and Troy (2%). Employment in Marion, Adair and Randolph Counties accounted for over 30% of jobs.

Commuting in and out of Hannibal

Most people employed in Hannibal also live there (44%). The residents of Marion (where Hannibal is located) and Ralls Counties, account for just under 73% of all employees. Almost 6% of Hannibal's employees live in Adams County, IL, where the city of Quincy is located.

The Local Employment Dynamics (LED) program is a partnership between the U.S. Census Bureau and the agencies in each state that generate and analyze labor market information. The LED On-the-Map tool allows you to designate either an area where workers work and determine where they live, or designate where residents live and determine where those workers commute.

Sector Employment

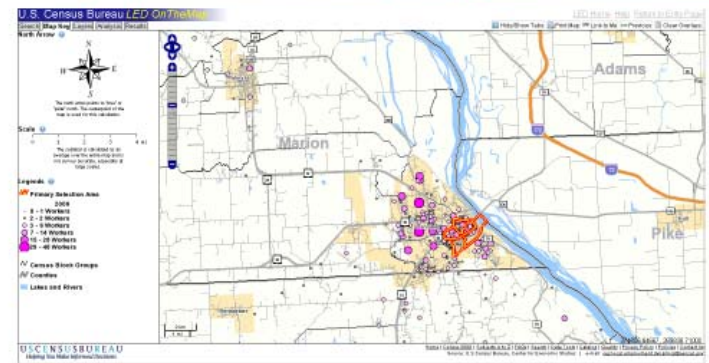

Employment in the private sector is primarily composed of manufacturing (25%), health care (22%) and wholesale and retail trade (18%). Employment in the public sector is primarily composed of educational services (50%) and public administration (28%).

Spring of 2008 Flood Effects on Employment in Hannibal

Where do people who work in the flood affected area live?

Of the 2,085 people who work in the flood affected area of Hannibal, 1,939 live in Missouri and 128 live in Illinois. 1,039 of these workers live in Hannibal, Missouri 71 live in Palmyra, Missouri and 64 live in Quincy, Illinois.

Southeast MO Hotspot - Sikeston

Discovering Employment Trends with Local Employment Dynamics (LED)

Sikeston is an economic and employment center for the Southeast region of Missouri. This report details the workers and industries that make this place a hotspot of economic activity.

Southeast Employment Hotspots

Sikeston, Cape Girardeau, Jackson and Farmington form the largest concentrations of employment in the Southeast Workforce Investment Area.

Workforce Investment Areas are the result of the federal Workforce Investment Act of 1998 (WIA) which funds a number of employment and training programs across the nation.

In 2006, 83% of all workers in the Southeast region were employed in the private sector. This means that 17% were employed in the public sector. Over 40% of all workers were employed in the cities of Cape Girardeau (16.1%), Farmington (6.9%), Sikeston (6.4%), Jackson (3.6%), Dexter (3.6%), and Perryville (3.5%). 43.4% of all workers were employed in Cape Girardeau (22.1%), St. Francois (12.4%), and Scott (8.9%) Counties.

Sikeston Census Overview

In 2000, Sikeston had a population of 17,015 with a median age of 35.7 years old. Most residents were employed in sales and office occupations (27.7%) and 73.3% had a high school education or higher.

Commuting in to and out of Sikeston

Sikeston gets most of its workers (65.7%) from Scott and New Madrid Counties. Sikeston's public sector workers work mostly in the Education, Public Administration and Health Care industries. Sikeston's private sector workers work mostly in Health Care, Retail Trade and Manufacturing.

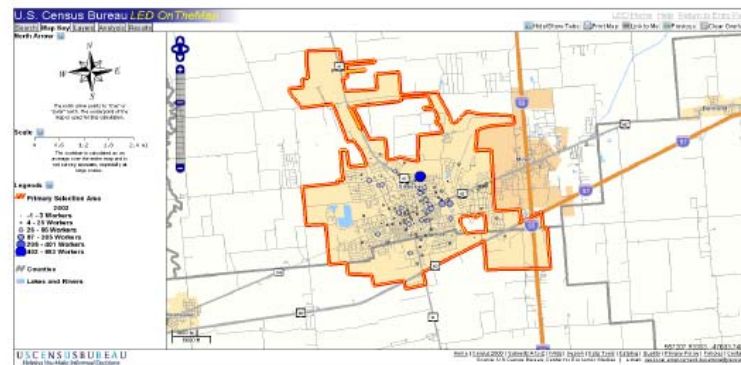

The Local Employment Dynamics (LED) program is a partnership between the U.S. Census Bureau and the agencies in each state that generate and analyze labor market information. The LED On-the-Map tool allows you to designate either an area where workers work and determine where they live, or designate where residents live and determine where those workers commute.

Illinois	18	0.0%	17	0.0%
All Other Locations	50	0.1%	54	0.1%

Data Sources

US Census Bureau, LED Origin-Destination Data Base (2nd Quarter 2002, 2004 and 2006)

Data Sources US Census Bureau, LED Origin-Destination Data Base (2nd Quarter 2002, 2004, 2006)

The percentage of workers coming to Joplin for work from other states declined from 12% to 10% between 2002 and 2006 even though the overall number increased.

Interstate Commuting -- Consultancy and E-commerce

Cross-State-Line Commuting from the Ozark Missouri WIA

This report highlights cross-state commuting patterns for the Ozark Workforce Investment Area (WIA) in Missouri. Specifically, this analysis focuses on non-Missouri residents coming to the Ozark WIA to find employment, and Ozark WIA residents leaving to work out-of-state.

Ozark WIA Commuting Patterns

Commuting Out of Missouri

Commuting In to Missouri

Analysis of those leaving Missouri or Missouri resident telecommuting shows a strong connection between the Ozark WIA and Chicago, Ill. Kansas City, Kansas Little Rock, Arkansas, and the northwestern counties of Arkansas. The strongest commuting connection is between the Ozark WIA and the northwestern counties of Arkansas.

Commuting Connections with Other WIAs

Ozark WIA	
Live and work in the Ozark WIA	40,216
Live in Ozark WIA, work in Mo outside of Ozark WIA	30,219
Work in Ozark WIA, live Mo outside of Ozark WIA	30,492
Live in Ozark WIA, work outside of Missouri	1,973
Work in Ozark WIA, live outside of Missouri	8,278

There were 32,192 workers who commute out of the Ozark WIA to find work, and 38,770 workers who commute into the Ozark WIA.

Live in Ozark WIA, Work in	
Arkansas	814
Illinois	227
Iowa	111
Kansas	385
Kentucky	47
Oklahoma	239
Tennessee	150
Outside of Missouri	1,973

The Ozark WIA is most closely connected for employment with northwestern Arkansas. The next strongest connections are between the Ozark WIA, Kansas City, Kansas and Chicago, Illinois.

Long Distance Connections with Ozark WIA

MERIC also analyzed the instances of Missouri workers who live in non-adjointing states. There were at least 50 workers per county employed from the Ozark WIA in the following counties:

- Maricopa County, Arizona (Phoenix – 61 jobs) and
- Los Angeles County, California (Los Angeles – 101 jobs).

There is a particularly close connection between the Ozark WIA and the state of Texas. There were at least 50 workers per county employed from the Ozark WIA in:

- Bexar County (San Antonio – 55 jobs),
- Dallas County (Dallas – 65 jobs),
- Harris County (Houston – 79 jobs) and
- Tarrant County (Fort Worth – 79 jobs), Texas.

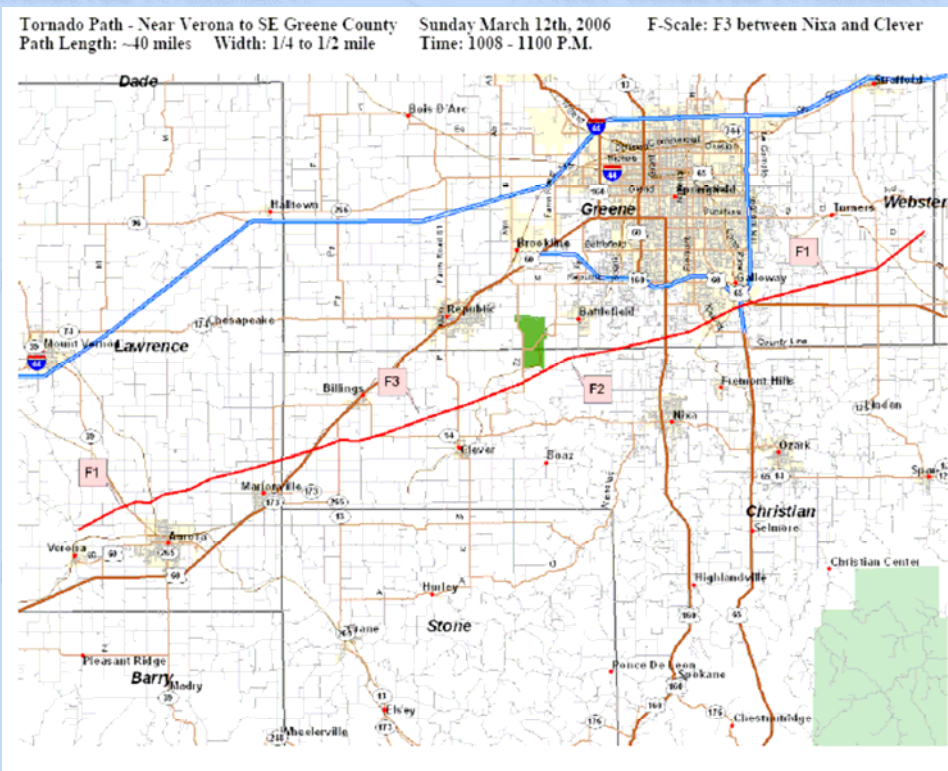

Notes and Sources

Local Employment Dynamics (LED) tables and maps were created by MERIC using LED data for Missouri, Illinois, Iowa, Kansas, Oklahoma, Arkansas, Kentucky and Tennessee housed at Cornell University. LED is a program developed by the US Census Bureau, in partnership with the state labor market information offices and the IRS. The most recent year for which data are available is 2004.

- Only commuting patterns between Missouri and the surrounding states are reflected in the maps and tables.
- Mapped commuting patterns represent at least 20 primary jobs linked between the other state's county and the Missouri WIA.
- References to commuting between non-surrounding states and a Missouri WIA represent at least 50 primary jobs linked between the other state's county and the Missouri WIA.

Disaster Assistance Planning

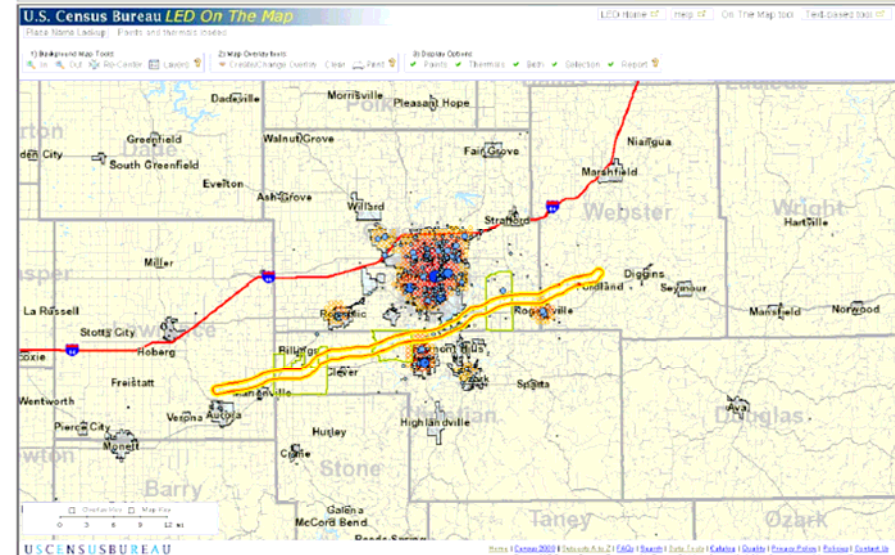

Tornado disaster evaluation

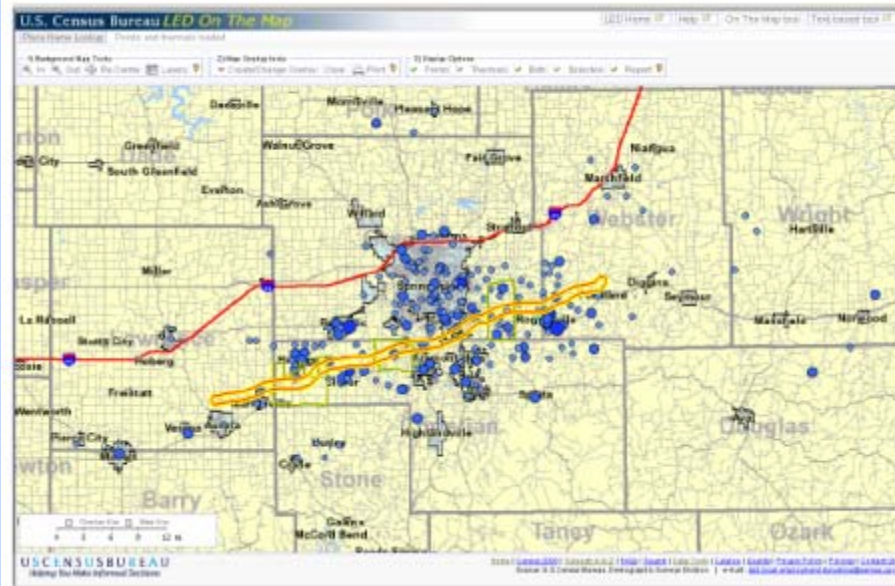

NOAA's National Weather Service

To evaluate the economic impact of a tornado using LED we first obtain the tornado track from the National Weather Service and using the LED buffer tool draw that track using an appropriate width. This allows us to show where those that live in the tornado track work, and where those who work in the tornado track live.

Where do people who live in the path of the March 12th 2006 tornado work?

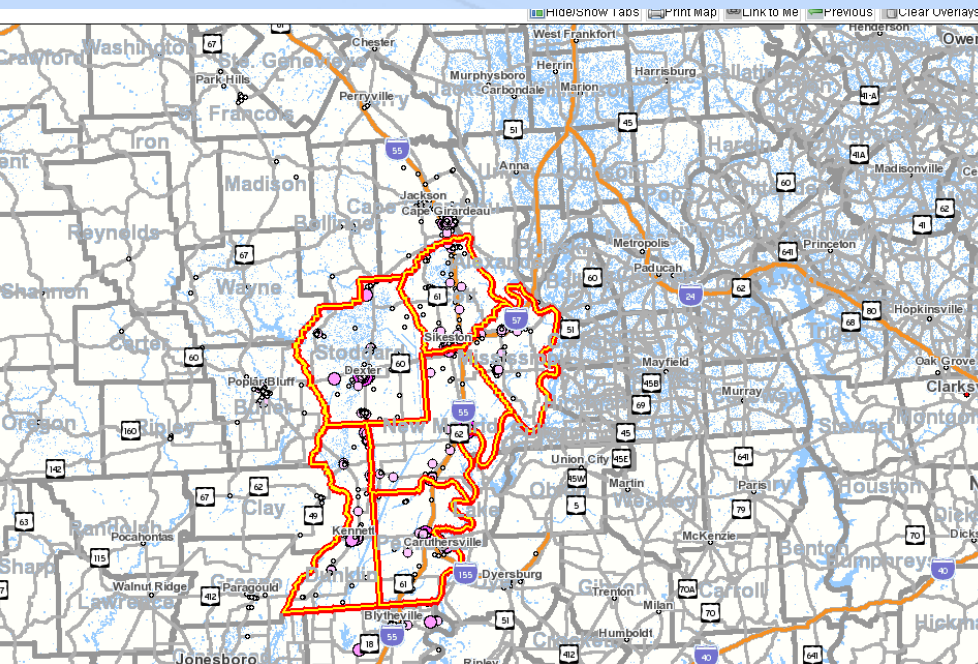

Where do people who work in the path of the March 12th 2006 tornado live?

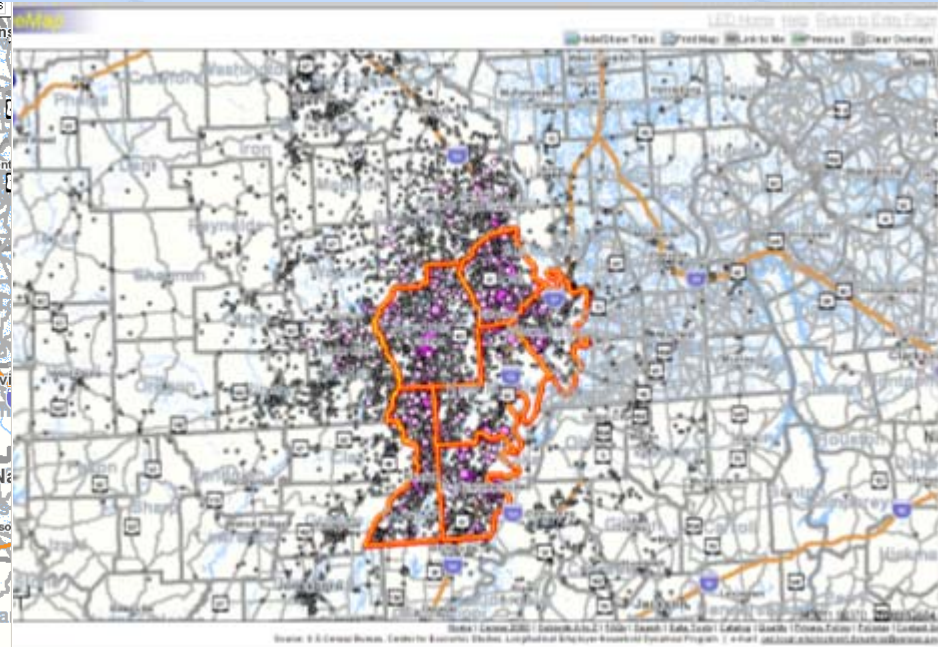

Disaster Assistance Planning

Earthquake preparedness planning

Where do people who live in Dunklin, Pemiscot, Stoddard, Scott, New Madrid and Mississippi Counties Missouri work?

This identifies the daytime population distribution.

Where do people who work in those counties live?

This identifies the night time population distribution.

It is important to identify the difference between the daytime and night time population centers in order to identify the roads, bridges and other infrastructure that will be critical in the case of an earthquake or other natural disaster.
