

Did the Housing Price Bubble Clobber Local Labor Market Jobs and Worker Flows When It Burst?

Question your work tried to answer	Did the Housing Price Bubble Clobber Local Labor Market Job and Worker Flows When It Burst?
Local Employment Dynamics data sources used	<input type="checkbox"/> OnTheMap <input checked="" type="checkbox"/> QWI <input type="checkbox"/> Industry Focus <input checked="" type="checkbox"/> Raw data files from CD or VRDC <input checked="" type="checkbox"/> Other: <i>National QWI (Abowd & Vilhuber, 2011)</i>
Other data sources used	Extensive, see appendix on linked site
Software/ data processing tools used	SAS (analysis), Stata (graphs), R (testing)
Brief description of methodology (if someone wanted to do a similar analysis, how should they approach it?)	Mixed-effects linear model at MSA level, with fixed national average coefficients, and stochastic deviations of MSA-specific coefficients from the national average (Section II of paper)
Benefits of methodology/ data	Flexibility, allows for predictions at MSA level.
Drawbacks/problems with methodology/data	
Anything else?	See http://digitalcommons.ilr.cornell.edu/ldi/2/ for complete appendix, full data source description, including generic SAS program. Analysis data and programs will be available soon on the site of The American Economic Review – Papers and Proceedings site.
Who and how to contact for more information:	John Abowd (john.abowd@cornell.edu) or Lars Vilhuber (lars.vilhuber@cornell.edu)
